

Technical data

Base layer: a PVC with excellent non-slip properties allowing good adhesion to table and other flat surfaces.

Top layer: A hard-wearing, easy to clean and minimal slip, PVC film welded onto the base layer.

Totally wipeable and re-usable.

Inks: Inks used to produce the images do not contain any dangerous chemicals such as heavy metals or carcinogens.

Cleaning of mats

It is recommended that mats are wiped with a damp cloth or sponge with warm soapy water or other mild detergent.

They can be dried with a towel or left flat to air dry. Be sure to store FLAT. Do not fold or allow the mats to crease.

Domestic cleaning agents may be used to remove more stubborn food and drink stains. Do not use bleach.

PLEASE NOTE: This product is NOT dishwasher or washing machine safe.

Do not iron. This is a PVC product, so very hot items may leave indents.

For more information on these mats please visit our dedicated website: www.redmats.co.uk
